

ShafayLead Email Verifier - User Manual

1. What is This Tool?

ShafayLead Email Verifier is a free Chrome Extension that helps you verify and clean email lists directly from your browser. It can validate single emails or entire Excel files, remove unwanted generic emails, and export cleaned results for further use.

2. How to Install

1. Download the extension ZIP file from the official website (<https://shafaylead.com>).
2. Go to Google Chrome and open: `chrome://extensions/`
3. Enable 'Developer Mode' from the top right.
4. Click 'Load Unpacked' and select the unzipped extension folder.
5. The extension will appear in your Chrome toolbar.

3. How to Use

- Validate Individual Emails:

- * Enter one or multiple emails in the textbox.
- * Use the dropdown to exclude generic emails like `info@`, `admin@`, `team@` etc.
- * Click 'Validate' to check the emails.
- * You can download the result as CSV.

- Validate Excel Email List:

- * Upload an Excel file containing email data.
- * Select the column that contains emails.
- * Click 'Validate & Clean' to process.
- * Download the cleaned file with status column.

- Settings:

- * Use 'Save Settings' to store your generic exclusion preferences.

4. Limitations

ShafayLead Email Verifier - User Manual

- No deep verification like SMTP (only basic format + domain validation).
- Not suitable for spam-trap or disposable email detection.
- All operations are local and private - nothing is uploaded to the internet.

5. Support

For help or feedback, visit <https://shafaylead.com> or contact the team through the website's contact form.
